Usage of the Frequency Band 57–66 GHz in Austria

Information of the Austrian Telecommunications Authority

Austrian Ministry for Transport, Innovation and Technology
Section III, Group "Telecommunication - Postal Services"
Radetzstraße 2, 1030 Vienna
www.bmvit.gv.at/en

Date: October 2011
The following conditions are applicable for usage of the frequency band 57–66 GHz in Austria:

**Point-to-point Microwave Links**

Point-to-point microwave links may be used in Austria in the following bands:

- 57–59 GHz in accordance with radio interface description FSB-RR018
- 59–63 GHz in accordance with radio interface description FSB-RR072

In both cases, installation and use of such microwave equipment is/will be generally licensed. The above mentioned radio interface descriptions can be found on [http://www.bmvit.gv.at/telekommunikation/funk/frequenzverw/downloads/fsbrr.pdf](http://www.bmvit.gv.at/telekommunikation/funk/frequenzverw/downloads/fsbrr.pdf)

**Wideband Data Transmission Systems**

Regulations for usage of the band 57–66 GHz by Wideband Data Transmission Systems with a maximum power of 40 dBm e.i.r.p. / 13 dBm/MHz e.i.r.p. are covered by the Commission Decision of 30th June 2010 amending Decision 2006/771/EC on harmonisation of the radio spectrum for use by short-range devices (No. 2010/368/EU). It has to be mentioned that fixed outdoor installations are not allowed.

Transposition of this Commission Decision into Austrian regulations was carried out by means of inclusion of this Decision in the Frequency Utilisation Ordinance. Accordingly, a general licence is applicable for installation and use of such equipment.
