

Actions supported by Austrian Climate Finance (2013)

Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution w/adjustment for Marker 1	disbursed	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
Ethiopia	mitigation	Sustainable Resource Management in North Gondar	2013-2016	BoFED	3,00	2,00	grant	contains Integrated Watershed Management, soil conservation and other measures to avoid land use change that could lead to GHG emissions, small energy component
Niger	adaptation	Humanitarian Assistance to vulnerable population affected by food crisis and floods in Diffa region	2013	CARE	0,40	0,36	grant	enhance the resilience of the targeted population to food and nutrition crisis through the establishment and/or reinforcement of food security stocks, early warning systems and community capacity building
Burkina Faso	adaptation	Humanitarian relief for Malian refugees and livelihood support for local agro-pastoralists	2013	HOPE'87	0,10	0,18	grant	Protect the livelihood of the agro-pastoralist households in the adjacent villages to the refugee camps in order to enhance their resilience to the adverse impacts of climate change.
Burkina Faso	mitigation/adaptation	Regional Programme Boucle de Mouhoun	2013-2016	Conseil Regional Boucle de Mouhoun	1,25	0,90	grant	Fund for regional development, including reforestation, soil conservation, food security adaptation, non-wood renewable energy/energy efficiency, capacity building
Africa region	adaptation	Financial Contribution to the African Water Facility	2013-2016	African Development Bank	0,75	1,50	grant	The Facility will support delivery of the Africa Water Vision 2025 which will result in Enhanced equitable and sustainable development and management of African water resources for poverty alleviation, socioeconomic development, regional cooperation, the environment and resilience to water-related disasters and climate change. The Facility promotes climate change adaptation and mitigation as an integral part of water governance.
Africa region	adaptation	Supporting Peace and Security in Ethiopia and Africa	2013-2015	IPSS	0,25	0,25	grant	The project purpose ist to create awareness and understanding of the security challenges of pastoralist communities in the Horn of Africa, with a focus on Ethiopia. Those security challenges are directly linked to water scarcity and land tenure questions, which are becoming worse due to climate change impact. Therefore adaptation measures are necessary to mitigate conflicts in the region
Westafrica Region	mitigation	Support to the ECOWAS Center for Renewable energy and energy efficiency (ECREEE)	2013-2016	ECREEE	2,00	0,60	grant	The Overall Objective of ECREEE is to contribute to the sustainable economic, social and environmental development of West Africa by improving access to modern, reliable and affordable energy services, energy security and reduction of energy related externalities (GHG, local pollution). The Specific Objective is to create favorable framework conditions for regional RE&EE markets by supporting activities directed to mitigate existing technology, financial, economic, business, legal, policy, institutional, knowledge and capacity related barriers.
Westafrica Region	mitigation	Capacity Development programm of the ECOWAS Center for Renewable energy and energy efficiency (ECREEE)	2013-2015	ECREEE	0,55	0,40	grant	capacity building as additional support to ECREEE
Eastern Europe Region	adaptation	Climate Forum East (CFE)	2013-2015	Austrian Red Cross	0,22	0,10	grant	The project aims at establishing the Climate Forum East (CFE) consisting of 120 environmental, socio-economic and humanitarian CSOs from the EaP region. The CFE will build a regional discussion platform involving also stakeholders from public sectors, universities, research and hydro-meteorological institutes as well as international organizations. This will enable a multi-stakeholder dialogue on climate change adaptation across the EaP region and contribute to new partnerships, increased transparency and enhanced contribution of Civil Society to climate policy dialogues (NB: this is the ADC contribution of 20% to a larger project mainly financed by EC)
Egypt	mitigation	improving market environment for high-quality solarthermal solutions in egypt and mainstreaming within the Tourism industry	2013-2016	Sekem Energy	0,50		grant	Following a previous project which developped solarthermal systems adapted to local conditions (i.e. sand, salt etc.), this projects aims at disseminating information about solarthermal energy, cosntructing a local production unit for solarthermal systems, and offering respective training for production, installation and maintenance
Armenia	adaptation	Communal Integrated Erosion Risk management	2013-2016	GIZ	0,85	0,70	grant	introduce best practice examples of integrated erosion control measures, combined with tailor-made capacity building, support of a suitable policy framework.
Nepal	adaptation, DRR	ViSTAR- Building resilient communities and institutions for natural disasters in Far and Mid-Western Region of Nepal	2013-2015	CARE, Handicap International	0,05	0,05	grant	To enhance the capacities and resilience of local authorities and communities vulnerable to natural hazards through effective linkages, strengthening DRR systems and structures and replication of DRR initiatives across project areas ((NB: this is the ADC contribution of 10% to a larger project mainly financed by EC)
Pakistan	adaptation, DRR	A Safer Tomorrow - Institutionalizing disaster preparedness in education system	2013-2015	HOPE 87	0,07	0,06	grant	This project aims to reduce the vulnerability of rural and urban populations in Pakistan living in areas most affected by natural disasters by increasing the preparedness and the response capacities of local communities and authorities to potential and frequent natural disasters, through (i) Institutionalization of school-based DP in KP Education department, including teachers training, curriculum manuals and school safety plans; (ii) Implementation and field testing of the SBDP model through the education department; (iii) Demonstrative and partial implementation of Schools Improvement Plans, primarily through available local resources and linkages to local development initiatives (NB: this is the ADC contribution of 20% to a larger project mainly financed by EC)
Southern Africa Region	mitigation/capacity building	SolTrain- solarthermal energy training and demonstration project in the SADC region Phase II, additional funding	2013-2016	AEE - INTEC	0,30	0,10	grant	The overall goal of SOLTRAIN II is to contribute to the switch from a fossil fuel based energy supply to a sustainable energy supply system based on renewable energies in general but based on solar thermal in particular. The project is going to be carried out in co-operation with five partners in Namibia, South Africa, Mozambique and Zimbabwe. The partners are three Universities, one regional solar association (SESSA) and one solar thermal company; the additional funds to the 2012 grant will allow for a prolongation of the project period until 2016, and for taking account Lesotho as an additional target country

Southern Africa Region	mitigation/capacity building	Contribution to the Energy and Environment Programme in Southern and Eastern Africa - Phase II	2013-2016	ForMin Finland (Delegated Cooperation)	2,00	1,00	grant	increased access to modern, affordable and reliable energy services through an increased usage of renewable energy technologies. The overall objective is expected to be reached by achieving result areas: (i) Market understanding, institutional support and knowledge management; (ii) Opportunities for public and private financing for project and business development; and (iii) Financing implementation of national or regional pilot and demonstration projects.
Southern Africa Region	mitigation	SADC center for Renewable Energy and energy efficiency (SACREEE)	2013-2016	SADC	1,80	0,80	grant	support for the installation of an competence center for renewable energy and energy efficiency in the SADC region
Himalaya/Hindukush Region	mitigation	contribution to the Medium Term Action Plan	2013-2015	ICIMOD	0,90	0,60	grant	Austrias contribution will be earmarked for ICIMODs Regional Programme on Transboundary Landscapes, which purpose is improved cooperation among RMCs for sustainable and inclusive ecosystem management in identified landscapes for enhanced and equitable livelihood benefits, contributing to the goal of conservation and management for sustaining ecosystem goods and services to improve livelihoods and enhance ecological integrity, economic development, and socio-cultural resilience to environmental changes
Uganda	mitigation/adaptation	Water and Sanitation Sector Financing	2013-2014	MFPEP Uganda	2,00	3,90	grant	The programme is a successor to the on-going Joint Water and Sanitation Sector Programme Support (JWSSPS) which ends by June 2013. In line with the mandate of MWE and the merging of the sectors the new JWESSP will also incorporate support to the environment and natural resources (ENR) sub-sector. The proposed JWESSP will be an integral part of the national sector framework, as the core instrument for joint support in the context of a Sector-Wide Approach (SWAp) for the Water and Environment Sector.
Caribbean Region	adaptation	Support to OCHA ROLAC DP and DRR activities 2013-2014	2013-2014	UN OCHA	0,10	0,20	grant	Latin America and the Caribbean is an extremely disaster-prone region. Frequently occurring floods, hurricanes and earthquakes erode the resilience of affected communities. The incidence of natural disasters in the region is expected to rise, partly due to the changing climate and environmental degradation linked to rapid urbanization. In 2014-2015, ROLAC will, amongst others, focus on strengthening preparedness at the country-level to ensure that key humanitarian teams are better equipped to lead emergency responses.
East Africa Region	mitigation	EAC center for Renewable Energy and energy efficiency (EACREEE)	2013-2016	UNIDO	1,00	0,50	grant	support for the installation of an competence center for renewable energy and energy efficiency in the EAC region
Georgia, Armenia	mitigation, REDD+	Complementary measures to ENPI FLEG Programm	2013-2016	World Bank - IBRD	0,80	1,60	grant	capacity building for and implementation of methods to reduce deforestation and forest degradation
Westafrica Region	mitigation, capacity building	TA for the ECOWAS center for renewable Energy and Energy efficiency	2013-2016	ECREEE	0,60	0,00	grant	TA Expert for the ECOWAS Center for renewable energy and energy efficiency (ECREEE)
Africa Region	adaptation	Technical Assistance Expert for the African Water Facility (AWF) of the African Development Bank (AfDB)	2013-2016	African Development Bank	0,60	0,02	grant	Technical Assistance Expert for the African Water Facility (AWF) of the African Development Bank (AfDB)
Bhutan	mitigation	Additional Technical Assistance to Dagachhu Hydropower Project	2013-2014	GNH Commission, RGoB	0,14	0,25	grant	Additional Technical Assistance to Dagachhu Hydropower Project
Southern Caucasus (mainly)	mitigation/capacity building	Early Transition Country (ETC) Energy Efficiency Programme	2013-2015	EBRD	2,00	2,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The program aims at developing and enhancing the technical and financial framework for energy efficiency investments in early transition countries, particularly in the Southern Caucasus Region. Identification and preparation of specific projects (e.g. energy audits, business plans) and capacity strengthening of selected partner banks (e.g. risk management for energy efficiency projects).
Europe and Central Asia Region	mitigation/capacity building	ECA Resource Efficiency	2013-2014	IFC	0,70	0,70	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The Project aims at improving operational processes to make more efficient use of inputs such as energy, raw materials and water along a company's value chain. In addition to the reduction of costs and pollution, effective cleaner production is a mitigation tool leading to a decrease in greenhouse gas emissions.
Eastern Europe and Central Asia, Caucasus, Western Balkans, SEMED	mitigation/capacity building	EBRD Resource Efficiency	2013-2014	EBRD	2,00	2,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. This technical assistance program aims to build capacity in appraising the financial and technical potential of resource efficiency (in water, energy, material, waste and pollution). Financial institutions learn how to assess the feasibility of energy efficiency and renewable energy projects and how to develop suitable financial products. Clients receive access to a new line of financial products and learn how sustainable energy investments can improve productivity and increase profits.
Eastern Europe and Central Asia, Western Balkan, SEMED	mitigation/capacity building	EBRD Municipal Environment Infrastructure Fund	2013-2014	EBRD	2,00	2,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The fund supports advise and promotes environmental infrastructure projects in municipalities in Western Balkan, Eastern Europe and Central Asia through training and capacity building to communal institutions. The focus is on Water/Waste, Energy, Transport with an emphasis on climate change.
Global	mitigation/capacity building	IFC Austria Climate Change Partnership Program	2013-2016	IFC	2,50	2,50	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The Program aims to improve resource efficiency of emerging economies and increase access to reliable and clean energy so as to support poverty reduction and sustainable economic growth.
Global	mitigation/capacity building	Energy Sector Management Assistance Program (ESMAP)	2013-2015	IBRD	1,50	1,50	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. ESMAP is a global knowledge and technical assistance program administered by the World Bank. It provides analytical and advisory services to low- and middle-income countries to increase their know-how and institutional capacity to achieve environmentally sustainable energy solutions for poverty reduction and economic growth. ESMAP is funded by more than 10 donors, as well as the World Bank.
Latin America & Caribbean	adaptation/mitigation/capacity building	Sustainable Energy and Climate Change Initiative (SECCI)	2013	IDB	0,80	0,80	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The goals of SECCI are centered around the provision of comprehensive sustainability options in areas related to the energy, transportation, water and environmental sectors as well as building climate resilience in key priority areas vulnerable to the impacts of climate change. The Initiative consists of four strategic pillars: Renewable Energy and Energy Efficiency, Sust. Biofuel Development, Access to Carbon Markets, Adaptation to Climate Change. Through SECCI the IDB aims at mobilizing additional funds to support its climate change strategy.

Western Balkans Region	mitigation/Capacity building	EBRD Municipal Projects in the Western Balkan	2013-2014	EBRD	1,00	2,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. This program provides assistance to small and medium sized municipalities and utility companies that have significant investments needs, but limited access to financing and poor capacity for preparing good quality projects. Technical Assistance would also support the development of the municipal credit market in the Western Balkans by building commercial banks' capacity to analyze and take municipal risk. The funds will be utilised for project preparation as well as for ongoing implementation and with an aim to develop the institutional capabilities of the borrowers and the commercial banks in the Western Balkans. The exact percentage share for climate finance cannot be calculated ex-ante.
Global	adaptation/mitigation/capacity building	Water Partnership Program (WPP)	2013-2016	IBRD	2,00	4,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The Water Partnership Program (WPP) focuses on addressing cross cutting issues related to water resources management strategies to include water supply and sanitation, irrigation and drainage, energy, and environmental services. Climate Change is mainstreamed throughout this program. Management's informal estimate is that at least 50% of the funding can be counted as climate finance but there is no exact percentage share available.
Sub-Saharan Africa	adaptation/mitigation/capacity building	IFC Advisory Services Activities in Sub-Saharan Africa	2013-2015	IFC	1,00	2,00	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. IFC provides Advisory Services (AS) focused on private sector development in Sub-Saharan Africa (SSA) with emphasis on enhancing the investment climate, promoting investment and developing small and medium enterprises. Within IFC AS SSA Climate Change is a cross-cutting theme that affect all areas of work. However, no estimate for a share that could be counted as climate finance is available.
Latin America & Caribbean	adaptation/mitigation/capacity building	Emerging and Sustainable Cities Initiative (ESCI)	2013	IDB	0,40	0,80	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. The goals of the Emerging and Sustainable Cities Initiative are to help intermediate cities in Latin America and the Caribbean to improve their environmental, urban and fiscal sustainability. The Initiative's three areas of focus are: (i) environmental sustainability and climate change (environmental management and local pollution control, climate change mitigation and climate vulnerability reduction and adaptation measures), (ii) comprehensive urban development and city design and (iii) fiscal sustainability and good governance. As Climate Change is mainstreamed through ESCI, no estimate is available of how much of the funds could be counted as climate finance.
Asia	adaptation/mitigation/capacity building	Cities Development Initiative for Asia (CDIA)	2013-	AsDB	0,80	1,60	grant	Financed by the Federal Ministry of Finance (MoF) of Austria. CDIA provides assistance to medium-sized Asian cities to bridge the gap between their development plans and the implementation of their infrastructure investments. The initiative uses a demand driven approach to support the identification and development of urban investment projects in the framework of existing city development plans that emphasize environmental sustainability, pro-poor development, good governance, and climate change. As Climate Change is mainstreamed through CDIA, there is no exact percentage share available of how much can be counted as climate finance.
Sub-Saharan Africa	mitigation/capacity building	Africa Sustainable Energy Facility (ASEF)	2013-2014	IFC, EIB, IBRD	2,00		grant	Financed by the Development Bank of Austria (OeEB) with grant funds provided by the Federal Ministry of Finance (MoF) of Austria. ASEF is a joint program by IFC and EIB to increase investments in renewable energy and energy efficiency. OeEB is providing additional funds (grant finance) for a support unit that is supposed to identify and facilitate investments. The facility includes a South-South technology exchange between private sector players which is managed by the World Bank Institute (WBI).
Armenia, Azerbaijan, Turkey, Ukraine	mitigation/capacity building	Energy Efficiency in the Financial Sector Study	2013	Private company	0,22		grant	Financed by the Development Bank of Austria (OeEB) with grant funds provided by the Federal Ministry of Finance (MoF) of Austria. Funding of a study to assess energy efficiency instruments in the financial sector.
Georgia	mitigation/capacity building	Bank of Georgia - capacity building for RE project investors	2013	Private company	0,45		grant	Financed by the Development Bank of Austria (OeEB) with grant funds provided by the Federal Ministry of Finance (MoF) of Austria. Capacity building support to investors of small hydropower projects in Georgia in project development phase (investors will receive funding from Bank of Georgia who in turn obtained a loan from OeEB earmarked for this purpose)
Tajikistan	mitigation	Kairakkum HPP Rehabilitation Feasibility Study	2013	EBRD	0,57		grant	This project supports the development of a feasibility study concerning the rehabilitation of the Kairakkum HPP in Tajikistan.
Kirgistan	adaptation/mitigation/capacity building	Impact of climate change and related glacier hazards and mitigation strategies, inter alia in the Tien Shan Mountains, Central Asia	2013	EU ERA-Net Circle	0,15		grant	This project aims to analyse the impact of climate change and related glacier hazards and mitigation strategies in the European Alps, Swedish Lapland and the Tien Shan Mountains, Central Asia
East Africa	adaptation	GEOSAF/FARMSUPPORT	2012-2013	FFG/ESA	0,15		grant	The aim of this project is to support agriculture and food production, including in the wider context of climate change, in East Africa
Sub-Saharan Africa	adaptation	SMACC: Improving rural livelihoods in Sub-Saharan Africa: Sustainable and climate-smart intensification of agricultural production	2013	N/A	0,03	0,03	grant	The goal of this project is to provide field-to-household-to-market strategies of selected key crops to help Sub-Saharan regions cope with climate change (CC). The research takes place in the Bahir Dar Region in Ethiopia and the Nakuru Lake Region in Kenya. With this project we attempt to encourage smallholder farmers with rural livelihoods to cope with climate change through a cyclical process of collaborative learning across agrofood value chains.
Sub-Saharan Africa	mitigation/adaptation	The role of enclosures on the diversity and productivity or rural landscapes in North Gondar, Ethiopia	2013	N/A	0,04	0,04	grant	The purpose of this project is, first to investigate the application of enclosures at the farm level, then study suitability of native woody plants with the preferred use of the household, and trace the principle behind the arrangement of trees on farms in the landscape. Increased abundance and diversity of trees on farms will contribute in the fight against global climate change by increasing carbon sequestration and being carbon sinks and also reduced greenhouse gas emissions.
Global	adaptation/mitigation/capacity building	Contribution to the Adaptation Fund	2013	World Bank	0,50		grant	Contribution to the Adaptation Fund
Global	adaptation/mitigation/capacity building	Contribution to the LDCF	2013	World Bank	1,50		grant	Contribution to the LDCF
Global	mitigation	REEEP 10th Project Call	2013-2017	REEEP	2,00		grant	This project supports REEEP's 10th project call entitled "Advancing Clean Energy Investment - Stimulating climate action and fostering energy access"
Global	adaptation/mitigation/capacity building	Crowdfunding platform	2013-2015	OGUT	0,30		grant	This project establishes a crowdfunding platform in support of climate-related projects in developing countries across the globe

Paraguay	mitigation/REDD+	Reducing CO2 emissions from rural areas and strengthening Indigenous Peoples and Peasant Communities Rooting through agroecology	2013-2015	Ceindra	0,30		grant	This project supports efforts to reduce CO2 emissions from rural areas and strengthening Indigenous Peoples and Peasant Communities Rooting through agroecology
Global	mitigation/capacity building	Contribution to the NAMA Registry	2014-2015	KPC	1,00		grant	Contribution to the NAMA Registry under the UNFCCC
Laos	mitigation/REDD+	Reducing emissions from deforestation and forest degradation in the Xe Pian National Protected area and its buffer zone	2013-2016	ÖBF	1,50		grant	The aim of this project is to support efforts to reduce emissions from deforestation and forest degradation in the Xe Pian National Protected area and its buffer zone
Global	mitigation	Interact Climate Change Facility (ICCF)	2013-2028	Misc. Partners	N/A	1,01	loan	The Development Bank of Austria (OeEB) funds through ICCF selected projects in the field of climate change, energy efficiency and renewable energy.
Armenia	mitigation	Ameriabank CJSC	2013-2021	Ameriabank CJSC	N/A	3,00	loan	The Development Bank of Austria (OeEB) provides a credit line to the tune of USD 15 Mio. to Ameriabank. At least 30% of this loan (i.e. USD 4,5 Mio.) is earmarked to be channelled towards renewable energy projects.
Global	mitigation	Global Climate Partnership Fund (GCPF)	2013-2023	Global Climate Partnership Fund (GCPF)	N/A	11,00	loan	The Development Bank of Austria (OeEB) provides a credit line to the tune of USD 30 Mio. to GCPF to finance projects in the field of climate change, energy efficiency and renewable energy.
Central America	mitigation	CABEI	2013-2018	Central American Bank for Economic Integration (CABEI)	N/A	18,00	loan	The Development Bank of Austria (OeEB) provides a credit line to the tune of EUR 30 Mio. to CABEI. According to the last report on sub-loans about 60% of the credit line (i.e. EUR 18 Mio.) is earmarked for renewable energy projects.
Georgia	mitigation	JSC Bank of Georgia	2012-2022	JSC Bank of Georgia (BoG)	N/A	1,30	loan	The Development Bank of Austria (OeEB) provides a risk sub-participation which covers a credit line to the tune of EUR 12,5 Mio. to BoG. The credit line serves to finance construction and rehabilitation of small and medium hydro power plants.
Honduras	mitigation	HPP La Vegona	2011-2024	Compania Hondurena de Energia Renovable S.A. (COHERSA)	N/A	6,06	loan	The Development Bank of Austria (OeEB) provides a credit line to the tune of USD 23 Mio to Compania Hondurena de Energia Renovable S.A. (COHERSA) to finance a hydroelectric power station in Honduras.
Kosovo	mitigation	Verbesserung der Fernwärmesysteme Prishtina	2012-2026	Community Heating Kosovo	N/A	0,50	loan	The Development Bank of Austria (OeEB) provides a risk sub-participation which covers a credit line to the tune of EUR 2,5 Mio. to the Ministry of Finance and Economy in Kosovo. The credit line serves to finance rehabilitation of community heating in Kosovo (energy efficiency).
