Instructions for completing this waybill:

1. In principle, a separate waybill has to be completed for each type of waste. (If several types of waste are indicated on a transport document (waybill), a separate waybill number and the relevant amount of waste has to be given for each type of waste in a way unambiguously showing which data belong together).

2. The transferor retains a copy of the waybill for his documentation. The waybill has to be carried during transport and must be passed on to the person taking over the waste (transferee). The person confirms proper takeover of the hazardous waste and keeps the waybill for his documentation. The transferee forwards a copy of the waybill to the transferor. Copies of waybills have to be marked.

3. The transferee has to report the waybill data electronically by way of the Register (edm.gv.at) within six weeks.

. Exception: If more than one transferee/transferor are involved (dropshipping) and the simplified procedure for dropshipping is applied (§ 13 ANV 2012), the first person taking over the waste has to be indicated on page 1 of the waybill; all other waste collectors and the final recipient have to be listed on the back of the waybill form (page 2). The waybill data have to be reported by the final recipient (point 3 of the instructions).

. In cases where different carriers are involved, the second and any further carrier have to provide the required information under the section "Notes".
